FOR ALL CIRCUMSTANCES GEBERIT DUOFIX

- Frames available in a range of heights, depths and functionalities
- Easily Installed with only four fixing points
- Adjustable drainage bend positioning
- Pre-wall fixing brackets and 90° bend included
- Tested to withstand 400KG of weight

← Geberit Duofix element for wall-hung toilet, ready for installation and equipped with cistern, conduit pipes and electrical connection point for a Geberit AquaClean shower toilet.

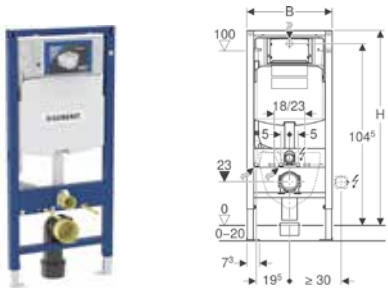

With Geberit Duofix, the plumber and the sanitary engineer can choose from a comprehensive range of universal self supporting installation elements.

Together with the associated rails and studs, these elements can be used to create complete, statically load-bearing prewall and partition wall installations including tile-bearing panelling – and all this quickly and cleanly on site. These enable free placement of the various sanitary appliances. Room-height prewalls do not require anchoring on the back side.

GEBERIT FRAMES AND CISTERNS

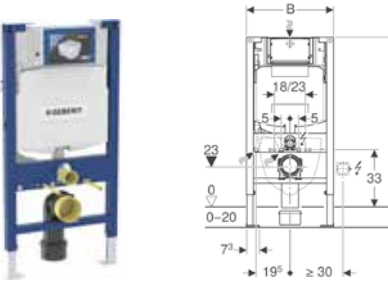

Pair our frames and cisterns with the relevant flush plates. Example: A Sigma frame must be paired with Sigma flush plate.

OUR APPROACH

Sustainability has been an integral part of Geberit's corporate strategy since 1990, with the goal of using innovative sanitary products to continuously improve people's quality of life. To achieve this, we develop sanitary products and services while taking economical, ecological and social aspects into account. As the European market leader, we want to contribute to a more sustainable sanitary industry.

OUR KEY FOCUS

Environmentally friendly, resource-saving, durable products are extremely important at Geberit. The key here is eco-design, with all products developed consistently in line with the eco-design principle since 2007: Seen across the entire product life cycle – from the provision of raw materials to disposal – each product must be better than its predecessor from an ecological perspective, without sacrificing on quality, functionality or durability. Eco-design covers all stages of this life cycle, thus contributing to the circular economy.

Geberit, has received a Gold seal from EcoVadis in recognition of its best-in-class sustainability management. This is the second consecutive year that we have attained the Gold rating and cements the company's position as a sustainability leader within the sanitary industry.

UP TO 50 YEARS SPARE PARTS AVAILABILITY*

QUALITY GUARANTEED

Geberit concealed cisterns are now classics in modern bathroom installation. The proverbial Geberit quality ensures that you can always count on clean and thorough flushing of your toilets. Our one-piece, blow-moulded cistern can be easily accessed at any time, simply remove the flush plate for quick and easy maintenance.

PRODUCT CONFIDENCE

Due to extensive product testing Geberit offers up to 50 years spare part availability* for all working parts within Geberit concealed cisterns and flush plates.

This gives new construction or renovation the safety and security of parts availability for years to come.

THOROUGHLY TESTED

In the endurance testing labs, cisterns, filling valves, shower toilets, flush plates and taps are subjected to computer-controlled lifecycle testing.

150 cisterns are simultaneously evaluated at a rate of at least 200,000 flushes per cistern.

The results of short and long-term testing serve as a guideline for production release and country-specific approvals.

*Purchases from January 2023, 25 years for Delta & Kappa, 50 years for Omega & Sigma.
